Wisconsin	Medicaid	04/01/99	185%	47,140		47,140
Wyoming	Separate	12/01/99	133%		2,547	2,547
National Totals				1,008,800	2,325,079	3,333,879

N/A = not available; FPL = Federal poverty level. Dark shading indicates that the State did not have this type of program as of September 30, 2000.

^a State-reported enrollment figures for SCHIP for October 1, 1999, through September 30, 2000. These figures do not include title XIX Medicaid enrollment.

^b Program type as of September 30, 2000.

^c Upper eligibility standard approved and in effect as of September 30, 2000.

^d For States with combination programs, this column shows the sum of the unduplicated number of children ever enrolled in the Medicaid expansion program during the year and the unduplicated number of children ever enrolled in the separate child health program during the year. Because a child may be enrolled in both programs during the year, there may be some double counting of children enrolled in these States.

^e Arkansas increased Medicaid eligibility to 200% of the FPL, effective September 1997, though a Medicaid section 1115 demonstration. Only children born after September 30, 1982 but before October 1, 1983, are eligible for SCHIP.

^f Because the State did not report annual enrollment for FFY 2000, the number shown is the number of children ever enrolled during the fourth quarter of FFY 2000. This is a low estimate of the number of children ever enrolled during the year.

^g Maine expanded coverage to 200% of the FPL on October 1, 1999. The enrollment counts for FFY 2000 reflect this expansion. Approval of the State plan amendment to raise the income standard is pending.

^h Maryland received approval on November 7, 2000, for a State plan amendment to implement a separate child health program on July 1, 2001.

ⁱ Maryland will raise its income eligibility standard to 300% of the FPL with the implementation of its separate child health program.

^j Because the State did not report annual enrollment for FFY 2000, the number shown is the number of children ever enrolled during the third quarter of FFY 2000 (the most recent quarter for which the State provided data). This is a low estimate of the number of children ever enrolled during the year.

^k New York has a net income standard of 192% of the FPL and a gross income standard of 230% of the FPL.

^l Tennessee has a Medicaid section 1115 demonstration that has no upper income eligibility standard. TennCare enrollees with income above the poverty level are charged monthly premiums; the State subsidizes premiums for recipients with incomes up to 400% of the FPL. SCHIP covers only children born before October 1, 1983, in the expansion group who enrolled in TennCare on or after April 1, 1997.

^m West Virginia folded its Medicaid expansion into its separate child health program, so that effective October 1, 2000, it has a separate child health program and is no longer a combination program.

ⁿ West Virginia raised its SCHIP income eligibility standard to 200% of the FPL effective November 1, 2000.
